RESEARCH INTERESTS

Human-Robot Interaction, Motion Planning, Machine Learning, Automated Vehicles, Unmanned Aircraft.

EDUCATION

Doctor of Philosophy, Computer Science and Engineering

University of Nevada, Reno, NV

May 2013

DISSERTATION - Models of Intention for Human-Robot Interaction

Advisor: Monica Nicolescu

Master of Science, Computer Science

University of Nevada, Reno, NV

May 2009

THESIS - Mind Reading for Social Robots: Stochastic Models of Intent Recognition

Advisor: Monica Nicolescu

Bachelor of Science, Mathematics

minor: Philosophy

University of Washington, Seattle, WA

June 2006

PROFESSIONAL EXPERIENCE

Nevada Center for Applied Research, UNR

June 2017 – Present

Senior Engineer

- Develop and submit grant proposals for research on intelligent transportation and robotics.
- Develop software and algorithms for autonomous ground vehicles.
- Develop software for connected infrastructure systems.
- Provide technical support to State of Nevada Unmanned Aircraft System FAA Test Site.

Nevada Advanced Autonomous Systems Innovation Center, UNR

June 2015 – June 2017

Senior Engineer

- Research and develop unmanned aircraft systems technology.
- Work with partner companies to develop and commercialize UAV technology.
- Develop software and algorithms for autonomous ground vehicles.
- Develop software for connected infrastructure systems.

Robotics Research Lab and Cyberinfrastructure Lab, University of Nevada, Reno May 2013 – June 2015

Research Assistant (Robotics Lab) and Data Portal Manager (Cyberinfrastructure Lab)

- Continued robotics and artificial intelligence research.
- Assisted in the development and operation of the Nevada Climate Change Portal.

Cyberinfrastructure Lab, University of Nevada, Reno

January 2013 – May 2013

Graduate Research Assistant

- Assisted in the development and operation of the Nevada Climate Change Portal.

Robotics Research Lab, University of Nevada, Reno
Graduate Research Assistant

2006 – May 2013

- Designed and implemented novel algorithms to enable robots to engage in social interaction with humans.
- Authored papers describing my research in social robotics and artificial intelligence.

Department of Mathematics, University of Washington
Student researcher

Summer 2005

- Researched computational complexity in the context of combinatorial optimization problems.

Disabled Student Services, University of Washington
Technical editor

2004 – 2006

- Prepared technical books for conversion to Braille and other accessible formats.

GRANTS

The Digital Twin Paradigm for Real-Time Transit Infrastructure Maintenance

2021-2022

Sponsor: Washoe County Regional Transportation Commission / Federal Transit Administration

Amount: \$130,500.55

Role: PI

Unmanned Aircraft Systems Test Sites IDIQ Task Order 1

2016

Sponsor: Nevada Institute for Autonomous Systems

Amount: \$136,828

Role: PI

UAS Traffic Management Support

2015-2020

Sponsor: NASA Ames Research Center

Amount: \$249,970

Role: PI

TEACHING

UNR CSE 493/693 - Directed Study: Unsupervised Learning

Spring 2017

Lead Instructor

- Introduced core algorithms for neural networks.
- Introduced concepts, mathematics, and implementation of generative adversarial networks.
- Introduced concept of variational inference.
- Introduced concept and implementation of variational autoencoders.

UNR CSE 793 - Independent Study: Deep Natural Language Processing

Spring 2017

Lead Instructor

- Introduced core algorithms for neural networks.
- Introduced unsupervised algorithms for word modeling.
- Covered recurrent neural networks for sentence processing.

UNR CSE 491/691 - Foundations of Autonomous Systems: Math, Minds, and Machines

Fall 2016

Lead Instructor

- Provided overview of formal systems, discrete math, and theoretical computer science with application to Artificial Intelligence.
- Gave introduction to programming with the lambda calculus.

UNR CSE 491/691Q - Deep Learning

Spring 2015

Lead Instructor

- Introduced seniors and beginning graduate students to the field of Deep learning.
- Designed lab sections to reinforce core course material.
- Course contents: Math review, machine learning overview, probability and statistics for regression and classification, gradient-based training, deep architectures, autoencoders, convolutional neural networks, neural language models, applications in speech, vision, and language processing.

UNR CSE 482/682 - Introduction to Artificial Intelligence

Fall 2014, Fall 2015

Lead Instructor

- Taught seniors and beginning graduate students the basics of classical and modern artificial intelligence.
- Course contents: History of AI, agent-based systems, search algorithms, basic optimization, dynamic programming, reasoning under uncertainty, machine learning, neural networks.

UNR CSE 491H/691H - Data Science & Big Data

Spring 2014

Lead Instructor

- Taught seniors and beginning graduate students how to work with large data sets and do machine learning in practical settings.
- Designed lab sections to reinforce core course material.
- Course contents: Data science workflow, data visualization, basic exploratory statistics, introduction to Python, numerical computing in Python, regression, classification, Kaggle competitions, group data projects.

UNR CSE 282 - Simulation Physics

Fall 2012

Lead Instructor

- Taught sophomores in Computer Science how to build simulations and computer games that use physics to increase realism.
- Designed lab sections to reinforce core course material.
- Supervised a TA for the purposes of grading and lab work.
- Course contents: basic kinematics and linear algebra, numerical solution of ordinary differential equations, implementing Newton's laws on a computer, 3D rotation via matrices and quaternions, rotational dynamics, efficient collision detection and resolution.

UNR CSE 457/657 - Database Management Systems

Spring 2012

Lead Instructor

- Provided an overview of modern database and data mining technologies to seniors and beginning graduate students in Computer Science.
- Course contents: relational databases, SQL, database-backed web applications, Ruby on Rails, NoSQL databases, distributed key-value stores, document databases, graph databases, supervised and unsupervised machine learning in Python.

UNR CSE 477/677 - Analysis of Algorithms

Fall 2011

Lead Instructor

- Taught design and analysis of algorithms to seniors and beginning graduate students in Computer Science.
- Course contents: basic asymptotic analysis, graph algorithms, greedy algorithms, dynamic programming, NP-completeness, and approximation algorithms.

UNR College of Engineering Computer Science Summer Camp

2010 – 2013

Camp Designer and Instructor

- Created the College of Engineering's Computer Science Camp, focusing on 3D Graphics and Digital Art and Animation.
- Taught campers (aged 14 to 17) how to build and animate 3D models using open-source tools such as Blender.

ACADEMIC ADVISING

Gaetano Evangelista

Ph.D. in Computer Science and Engineering

Spring 2024 (expected)

Jamie Poston
M.S. in Computer Science and Engineering
Thesis: *Predicting Agent Behavior By Estimating Motion Planners* Spring 2020

Houston Lucas
M.S. in Computer Science and Engineering
Thesis: *Differentiable Boundary Value Problem Solver* Spring 2020

Niki Silveria
M.S. in Computer Science and Engineering
Thesis: *Optimal Strategy Imitation Learning from Differential Games* Winter 2017
